

# 4 ways HelloSign can help HR teams speed up onboarding

## Don't let onboarding go overboard

Without the right tools, onboarding employees and contractors can be clunky and time-consuming. And that means a bad experience for both employers and employees.

## Work smart, not hard

With HelloSign's eSignature technology, onboarding can be done entirely digitally, with minimal possible fuss – meaning new hires get onboarded up to three times faster.

## Learn from the industry-leader

Here are 4 ways HelloSign can help your HR teams speed up the onboarding process.

### 1

## Integrate HelloSign with your existing systems, and never switch apps again

HelloSign has an open API that's designed to fit seamlessly into your existing onboarding processes. Directly integrate HelloSign using the API, and automatically send completed forms to your backend HR systems or your Dropbox account.

Applicant-tracking system Fountain has used HelloSign to massively speed up the contract-signing process:

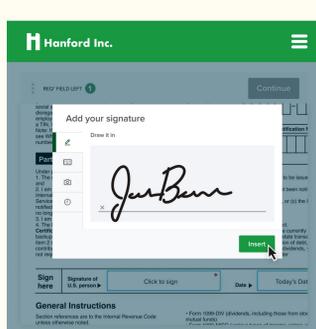

1,000,000 applications processed a month

96,000 monthly hires enabled

10x the growth achieved for just one client

“At Fountain, we strive to provide a seamless branded experience across corporate sites and customized job directories ... Automated document signing supports this, allowing candidates to apply for jobs on the go and move swiftly to be hired.”

Sean Behr, CEO of Fountain

### 2

## Use templates to make onboarding paperwork simple, even at scale

Customizable templates paired with a batch-send functionality means you can provide all the documentation new starters need to fill out when joining, whether there's one, or one hundred. Employees can sign contracts, 1099s, W-2s, W-9s, NDAs, and other forms on the spot – and get up to speed, fast.

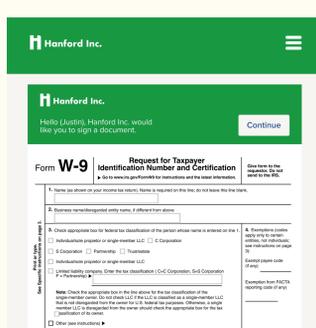

HR teams at Danish grocery wholesaler Dagrofa are saving time and money with HelloSign's rapid customizable and automated contracts:

100% digital process

200 different contract variations, with the click of a button

“Contracts are more efficient with almost no errors, they're completed faster, employees are better onboarded, and overall there are less problems and less paperwork.”

Lintolu, Product Owner for Digital Solutions

### 3

## Improve contract completion rates with mobile-friendly forms

HelloWorks is designed for mobile and speeds up onboarding by pre-populating data into forms and only showing relevant information to new hires. The result is a dynamic, mobile-first form-filling experience that's fast and simple for new hires to complete.

US Grocery delivery and pick-up service Instacart has massively simplified onboarding, thanks to HelloSign:

96% contract completion rates

270% speed increase in onboarding

50+ hours time saved per week

“Under the legacy system, processing paperwork took our team at least 3-5 minutes per shopper. HelloWorks saved the Instacart team 50+ hours per week.”

Bill Babeaux, Product Manager

### 4

## Rest at ease with legally binding, court-admissible signatures

Legally binding and court-admissible eSignatures mean that HelloSign offers nothing short of bank-level security. A comprehensive audit trail, including a time-stamp and IP address is provided along with every signature request – as well as every time the document is viewed and signed – guaranteeing protection at all times.

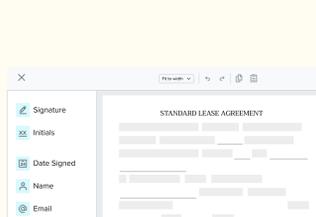

Payments provider Celopay uses our legally-binding signatures to protect against false claims and a range of other security risks:

7 days to fully integrate HelloSign into Celopay's platform

24/7 live chat support means we're on hand for any emergency

“We were using another eSignature vendor before, but issues kept coming up. Our company name is on the our branding block when issues arise, even if it's out of our control. We needed something that could provide consistent and reliable performance.”

Jason Harper, Founder
